

## A Manual of Metallurgy; More Particularly of the Precious Metals, Including the Methods of Assaying Them

Filesize: 9.08 MB

### **Reviews**

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*  
*(Ms. Fatima Erdman)*

Theclassics.us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1865 edition. Excerpt: .The ore being heated to bright redness, the galena is thrown in by portions at a time, and constant stirring is kept up, so as to thoroughly mix the ore and galena. This done, 2 cwts. of litharge is next added, in similar manner. This supplies oxygen to the sulphur of the galena, and the whole of the lead, thus being reduced, combines with the platinum metals, but at the same time introduces into the mixture any small portions of silver originally contained in the galena. A little glass is used as a flux during this part of the operation. After standing in the state of fusion for a time, an upper bath will be formed, containing an alloy of lead with platinum, palladium, and silver: the other metals, being unacted upon by the treatment, will, by their superior density, subside to the bottom, after which the platinum alloy is carefully ladled off for future refining operations. The first of these consists in cupelling upon a test the platina lead, whereby the lead is disposed of by oxidation. The metal left is then ready for actual refining. The effecting of this depends upon means whereby they have been able to melt platinum, and thus bring the operation into the class of ordinary metallurgic operations. The essential part of the apparatus consists of a kind of furnace; shaped out of well-burned lime, and which may be somewhat compared to a cupel in its use in...
