

Crypto Authentication System Using Hilbert Matrices

By V. Krishna Raja, Penmetsa / Chakravarthy, A. S. N.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | A Novel Approach | While cryptography is the science of securing data, cryptanalysis is the science of analyzing and breaking secure communication. Classical cryptanalysis involves an interesting combination of analytical reasoning, application of mathematical tools and pattern finding. New cryptographic algorithms need to be designed considering the probable future developments while working on their designs, as continuous improvements in computer processing power have increased the scope of brute-force attacks. Thus we may have to think about increasing the key lengths and block lengths. There are mainly two types of crypto-systems, namely, symmetric crypto-systems and public crypto-systems. | Format: Paperback | Language/Sprache: english | 160 pp.

Reviews

This is an incredible ebook which i actually have ever go through. This can be for those who statte that there had not been a really worth reading. I am just quickly can get a delight of reading a published book.

-- Ms. Colleen Ziemann V

A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Ms. Teagan Osinski III
