Nova Science Publishers Inc, United States, 2012. Hardback. Condition: New. UK ed.. Language: English . Brand New Book. The high-throughput techniques underlying a systems level analysis of biological organisms have emerged as powerful tools in the study of disease mechanisms. On the other hand, they require substantial funding and multidisciplinary skills. Therefore, basic biochemical/cell biology methods from molecular bioscience are still needed to address key biological questions. This book uses the auto-immune disease Pemphigus Vulgaris (PV) as an experimental model of epidermal disease. Simple molecular bioscience principles and high-throughput methods to clarify disease pathophysiology are presented, which lead to novel therapeutic modalities.
