Brand New Book ***** Print on Demand *****.Excerpt from Images of Four Kinds of Engineers: June, 1968 Using a semantic differential and several rank-order questions, two hundred and eighty-four Employed Engineers and Senior Engineering Students reported their perceptions of four engineering sectors: Research Engineers, Design and Development Engineers, Field Service Engineers, and Production Engineers. Engineers in all sectors were perceived as high on conscientiousness and dominance, but a scientific emphasis factor occurred only for Research and Design Engineers, who were also seen as highest in competence and prestige. Practicing Production Engineers agreed with the relatively unfavorable image of their sector. The engineering student s perception of sector prestige is close to that of his faculty but the junior employed engineer s perceptions are close to those of his senior colleagues. Implications of this rapid socialization process for job design and recruitment procedures are discussed.
